

## ENVIRONMENTAL POLICY

As the UK's leading distributor of building materials to the trade, construction and home improvement markets we take our environmental responsibilities seriously and we're proud to have maintained our ISO 14001 accreditation for over ten years.

The Travis Perkins Board is accountable for this policy and will endeavour to deliver the Group's environmental programmes alongside the group's strategy to increase value for stakeholders. Our policy commitments are delivered through our objectives which are owned by the Group Leadership Team and support our aspiration for continual environmental improvement.

We will retain our certified Environmental Management System (EMS) to help fulfil our compliance objectives which underpin our aim to remain legal, prevent pollution and embrace environmental opportunities.

Our key operational commitments are to:

- Reduce our waste, divert it from landfill and enhance our reuse and recycling programmes.
- Continue to measure and reduce our carbon footprint, seek alternative renewable energy solutions and improve our vehicle fuel efficiency.
- Better understand our products' environmental footprint and reduce it.
- Develop and deliver environmental training to enhance our colleagues' knowledge and skill enabling them to improve our environmental performance.

We recognise the impact our activities have on the natural and built environment. Our lifecycle approach to our products, services and operations will help us to understand, manage and reduce the impacts throughout our supply chain.

Supplier engagement is crucial to our environmental strategy. We will continue to review the implementation of our Supplier Commitments to influence and develop our supply base. Supplying legal, sustainable timber, reducing waste and reducing energy and water use are the key areas where we are working with suppliers. We will continue to help suppliers identify efficiency opportunities and demonstrate the sustainability of the products and services we supply.

We will continue to communicate our environmental performance to our stakeholders and will use credible verification exercises to produce accurate and transparent reports. This environmental policy will be reviewed annually.
